Canon

SELPHY

COMPACT PHOTO PRINTER

Set your images free.

Simple. Special. Stunning. SELPHY.

Canon's range of SELPHY Compact Photo Printers gives you far more than stunning, photolab-quality prints of your digital photos. They give you the freedom to print whenever, however and wherever you want. And every printer in the SELPHY range is simple to use, incredibly quick and remarkably compact. Don't keep your digital memories trapped in bits and bytes – set them free with SELPHY.

A PHOTOLAB FOR HOME...

Every SELPHY printer has a beautiful appearance and compact shape that fits in perfectly with the interior design of almost any home. And they're so simple to use, you can have a beautiful photo print in your hands literally seconds after connecting your camera or inserting your memory card.

...AND AWAY

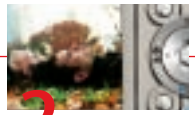
While most of the SELPHY range are designed for the home, the SELPHY CP330 model comes with a battery pack that lets you print wherever your photographic adventures take you – on the road, or at the beach.

ANY CAMERA, ANY TIME

Every printer in the range is PictBridge compliant. This means that all Canon Digital Still Compact cameras (both PictBridge and Canon Direct Print compatible), any PictBridge compatible digital camera, some digital SLR cameras and camcorders, and even some camera phones* – will work. Simply connect it to the printer (or in the case of the SELPHY DS700, you can also place your memory card into the dedicated slot), select your image and print. No PC required. It's that easy. In fact, it's just as easy to refill the paper or ink in the printers – another design consideration that makes the SELPHY range so special.

* printing from a compatible camera phone via IrDA is only possible with SELPHY CP330 and SELPHY DS700.

1 CONNECT
your camera directly to the printer.



2 SELECT
the image you want – crop or trim for maximum effect.

3 PRINT
your pictures in a variety of sizes.

To make direct printing even easier, most of the latest Canon digital cameras have a Print/Share button that illuminates when ready and automatically prints the selected image when pressed.

PictBridge DIRECT PRINT

The beauty of choice.

Every SELPHY printer allows you to choose from a number of different printing formats depending on your needs. And with each printer you are sure to get durable, fade resistant photographs with an astounding colour range and sharpness every time.

PHOTOLAB QUALITY

Used in the SELPHY CP330, SELPHY CP500 and SELPHY CP400, dye-sublimation technology delivers high-quality, fade resistant 300 dpi prints with a similar look and feel to the traditional silver halide prints you get from the photolab. Every print is covered with a high-gloss protective coating to help protect it from moisture and fading. And all this from a range of printers barely larger than the paper they print on.

FINE TECHNOLOGY FOR SPEED, DETAIL AND COLOUR

The SELPHY DS700 produces bright, vibrant, durable prints using a unique Bubble Jet printing technique combined with Canon's new FINE print head. You can print on a variety of surfaces too, from a super high gloss to a satin finish.

100 YEARS PRINT

PRINTS THAT TAKE SECONDS... AND LAST A CENTURY

All the SELPHY printers produce high-quality borderless prints in a matter of seconds. This is especially useful when printing a series of photographs – they'll be ready in minutes, not hours. Best of all, every SELPHY print can last up to a hundred years* in your favourite photo albums.

* See specifications for details.

THE CHOICE IS YOURS

Not everyone wants a standard size print. Thankfully the SELPHY Compact Photo Printers are extremely accommodating. Choose from bordered and borderless 6" x 4" size, 4" x 8" wide size prints, credit card size prints, stickers and even mini-stickers. Canon digital cameras give you the option to rotate the image 90 degrees or crop/zoom in on details – and with the latest Canon cameras you can also create ID Photo Prints and Movie Prints.*

* Options depend on camera, printer, printer tray and printing standard chosen.

Whenever, Wherever.

With its compact, stylish design and ability to deliver stunning, photolab quality prints wherever you are, the SELPHY CP330 gives you plenty of printing opportunities. It has a rechargeable battery so you can take it to the park, the cafe or even into your car and have your prints in a matter of seconds. In fact, you don't even need a camera - you can print via IrDA from a compatible camera phone for a truly mobile experience*.

SELPHY CP330

COMPACT PHOTO PRINTER

- High quality and durable colour photo prints
- Prints directly from any PictBridge compatible camera – no PC required
- Quick and easy to use
- Rechargeable battery pack included
- Wireless printing from some camera-phones via IrDA*
- Multiple paper sizes available (postcard, wide 4" x 8", credit card and mini-stickers)
- Irresistibly chic design and super compact
- Printing from Windows and Mac computers also supported (software supplied)
- Optional car adaptor kit available

* See specifications for details.

The CP330 provides wireless printing from camera phones with an IrDA port*. However, the IrDA functionality of some camera phones may be de-activated or otherwise not available for reasons related to the country in which you are located, the phone model or the network provider.

- Family photo printer providing photo-lab quality 6" x 4" prints
- Connects to a television for easy operation - viewing and printing of digital camera images - remote control included
- Stylish, compact design to complement other entertainment systems in your living room
- Prints a high quality, borderless photo in approx. 85 seconds
- Up to 4800 x 1200 dpi* resolution with FINE technology and 2pl Micro- Nozzles
- Prints photos directly from popular memory cards and camera phones (via IrDA*)
- Direct photo printing from PictBridge compatible digital cameras and Camcorders – no PC required
- Windows/Mac compatible, USB connectivity

* see specifications for details.

See what your TV can do.

The SELPHY DS700 is designed to connect directly to your TV – your new digital printing nerve centre. Simply plug your memory card into the printer. You can then view all your images on the TV screen, and using the printer's remote control, select your favourites for printing from the sofa. You'll have them in your hands in a matter of seconds.

SELPHY DS700
COMPACT PHOTO PRINTER

Built for speed. Designed for style.

As the fastest printer in the SELPHY range, the SELPHY CP500 is as quick as it is gorgeous. Hidden inside its tiny, stylish design is a remarkable level of technical capability that never fails to impress. Select your shots, select a format, and within seconds you'll be passing around durable, glossy photo prints amongst your friends.

SELPHY CP500
COMPACT PHOTO PRINTER

- High quality and durable colour photo prints
- Prints directly from any PictBridge compatible camera – no PC required
- Quick and easy to use
- Fast borderless photo printing
- Multiple paper sizes available (postcard, wide (4" x 8"), credit card and mini-stickers)
- Stylish and super compact
- Printing from Windows and Mac computers also supported (software supplied)

- High quality and durable colour photo prints
- Prints directly from any PictBridge compatible camera – no PC required
- Quick and easy to use
- Affordable and fun printing for all the family
- Multiple paper sizes available (postcard, wide (4" x 8"), credit card and mini-stickers)
- Stylish and compact
- Printing from Windows and Mac computers also supported (software supplied)

SELPHY CP400
COMPACT PHOTO PRINTER

Printing fun for everyone.

Fast, fun and easy to use, the SELPHY CP400 is perfect for the whole family or anybody who loves to share their memories. Simply plug in your PictBridge compatible camera, choose your favourite shots and you'll have photolab quality prints in no time – great for the photo album or for sending off to friends and family.

Print via PC.

While the SELPHY range has been designed primarily for Direct Printing, you can also print via your PC or Mac. Printer drivers are supplied with every SELPHY product.

EDIT, BROWSE AND SHARE

ZoomBrowser EX and PhotoRecord (both for Windows) as well as ImageBrowser (for Mac) are supplied as standard with all SELPHY printers. The SELPHY DS700 printer also comes with Easy-Photo Print 3.0 for Windows and Mac. These applications help you to transfer, browse, archive and retouch your photos. You can also make slideshows and resize your images for sending out via email. PhotoRecord allows you to create and print digital photo albums – with text, backgrounds, picture frames and more -– with easy to follow, step-by-step selections.

1 Requires optional paper cassette
2 Not all modes/features are supported by all cameras
3 Pictures must be taken in the JPEG format and transferred using the IrMC/IrOBEX protocols
4 Addressable resolution
5 Print volume figures may vary according to the content of the image and the print mode. Calculation based on an average of four printers run continuously until ink out printing Canon 24 standard digital images in default mode on PhotoPaper Plus Glossy (PP-101), 10x15cm borderless print
6 Print speed obtained using compatible Canon digital camera incorporating DIGIC II <other camera models may vary>
7 Print speed obtained using compatible Canon digital camera.
8 Print time when printing a 5 Megapixel image direct from a memory card or digital camera on Photo Paper Plus Glossy
9 Compact Flash, Microdrive, Smart Media, Multimedia Card, SD Card, Memory Stick, Memory Stick PRO, Memory Stick DUO*, Memory Stick DUO PRO, xD-Picture Card*, miniSD Card* (*Can be used with the addition of a special adapter sold separately)
10 To test the image permanence of prints that are stored in an album, we use the accelerated testing method as how the image permanence of silver-halide photo papers are measured when stored in dark places. Print samples are printed with the optical density of 1.0 (each Bk, C, M, Y). The samples are kept in a certain environment of high temperature and 30% humidity. The rate of the decrease in the optical density and rate of yellow discolouration are recorded. The recorded results are then converted to the length of time when print image is kept in an environment of 25°C/30% humidity.
11 Based on accelerated testing, assuming image is stored in an album at 23°C/50% R.H. and printed using "Genuine" Canon inks onto Photo Paper Pro.
12 Feature not supported when connected to a Canon camera
13 Languages supported are English, French, German, Dutch, Spanish, Italian, Swedish, Portuguese

Some images are simulated for clarity of reproduction. All data is based on Canon standard testing methods except where indicated. Specifications are subject to change without notice. ™ and ®: All company and/or product names are trademarks and/or registered trademarks of their respective manufacturers in their markets and/or countries.
